

CHLORIDE

Secure Power Always

Create a new stream of revenue with this cost-effective way to manage critical loads.

Introducing Agility Series UPS, 750-3000 VA

NEW!

Start a new stream of revenue with Agility Series UPS, 750-3000 VA.

Peace-of-mind at a competitive price.

Avoid business interruptions with the solid reliability of Chloride's Agility series UPS.

Agility utilizes microprocessor-based control that maximizes efficiency and helps lower operating costs — ideal for servers, communications equipment, and other critical applications.

- Protects battery with line-interactive topology that compensates for most voltage fluctuations
- Provides monitoring capabilities for power conditions and UPS alerts through Chloride's advanced Connectivity suite
- Works with Chloride and third-party UPSs in multi-vendor environment; certain connectivity options allow connection of UPSs to building automation systems

Build more profitability today with the Agility UPS critical power solution!
